

A 92.9/1 Pou 1-1 (11-90-7)
HATCHERY PRODUCTION
NOVEMBER 1960

December 15, 1960

Chick Production

Commercial hatcheries produced 159,733,000 chicks in November, an increase of about 12 percent from November 1959. Production of broiler-type chicks totaled 143,621,000, compared with 129,729,000 in November last year--an increase of 11 percent. Number of broiler chicks hatched during January through November totaled 1,804,359,000, up 6 percent from the same months of 1959. The broiler-type hatch in December is expected to be larger than a year earlier, as the number of eggs in incubators on December 1 was 8 percent larger than on December 1, 1959.

Production of egg-type chicks during November 1960 totaled 16,112,000, compared with 13,465,000 during November 1959--an increase of 20 percent. Production during the first 11 months of 1960 totaled 463,943,000 chicks, down 12 percent from the same period last year. Eggs in incubators December 1, 1960, indicate that the hatch of egg-type chicks will continue larger than a year earlier.

Poult Production

The hatch of heavy white breed poults during November 1960 totaled 1,270,000, up 7 percent from November last year. The hatch of the other heavy breeds (mostly bronze) was 641,000 poults, or 70 percent more than the seasonally light hatch of 376,000 in November 1959. For the year to date, January through November, the heavy white breed hatch of 22,418,000 was up 14 percent from the same months of 1959. The aggregate hatch of other heavies, January through November, was 54,780,000--an increase of 6 percent from the same period last year.

Output of light breed poults in November totaled 560,000--up 54 percent from November 1959. However, the January through November cumulative hatch of light breed poults at 10,822,000 was 29 percent below the same period a year earlier. Total hatch of all breeds in November was 2,471,000, an increase of 28 percent from November last year. Eggs in incubators December 1 indicate that the December hatches of each of the turkey breed classes will be larger than in December 1959.
